

REMARKS/ARGUMENTS

This is in response to the Final Office Action of November 13, 2007, supplemental to the response of March 13, 2008 and in view of a telephone interview with the Examiner. The claims have been amended as suggested by the Examiner to clarify that axis of rotation within a single wheel change and not relative to another wheel as in the cited reference U.S. Patent No. 5,400,672 to Bunch, Jr. A request for continued examination is attached to ensure entry.

Bunch, Jr. does not disclose, teach or even suggest a rotation axis shift within a single wheel.

Independent claims 11, 18 and 20 have been amended and are allowable. Dependent claims 12-17, 19 and 21 are similarly allowable and such favorable action is respectfully requested.
